Representative Dan Lungren  
U. S. House of Representatives  
2448 Rayburn House Office Building  
Washington, DC 20515-0001

Subject: Re: Federal-State Joint Board on Universal Service CC Docket 96-45

Dear Representative Lungren:

I have serious concerns regarding the Federal Communications Commissions' (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so.

A flat fee tax could cause many low-volume long distance users, like students, prepaid wireless users, senior citizens and low-income residential and rural consumers, to give up their phones due to unaffordable monthly increases on their bills. Shifting the funding burden of the USF from high volume to low-volume users is radical and unnecessary. In addition, it would have a highly detrimental effect on small businesses all across America. The Keep USF Fair Coalition, of which I am a member, keeps me informed about the USF issue with monthly newsletters and up to date information on their website, including links to FCC information. While I am aware that federal law does not require companies to recover, or "pass along" these fees to their customers, the reality is that they do. As a consumer I would like ensure I am charged fairly. If the FCC goes to a numbers taxed, my service will cost more. And according to the Coalition's recent meetings with top FCC officials, the FCC has plans to change to a flat fee system soon and without legislation.

I will continue to monitor developments on the issue and continue to spread the word to my community. I request you pass along my concerns to the FCC on my behalf, letting them know how a flat fee tax could disproportionately affect those in your constituency.

Thank you for your continued work and I look forward to hearing about your position on this matter.

Sincerely,

Pamela Baker

Re: FCC File No. BPTTA-20050127ALO

Gentlemen:

I understand the above application has been filed by Station WOCH Chicago to increase the wattage allocated to it on Channel 41. I request the FCC approve the application. WOCH is one of several ethnic channels I watch to learn more about other cultures. I especially like that WOCH has gone out of their way to subtitle a lot of programming in English so that people like me can watch even though I have no interest in learning the Korean language.

I have been an English-speaking viewer of WOCH for 2 years. I consider WOCH an invaluable resource for education about Korean culture and entertainment, and if I, and people like me, were to be unable to view its programs in the future, I think it would impoverish my life and the lives of countless others in the Chicago area. I am a member of one of the largest on-line fan clubs of Korean--specifically WOCH--programming (Chicago Korean Drama Fan Club). That community has been enriched through this programming not only because of the cultural and historical information imparted, but because without the English-subtitled programming provided by WOCH, our on-line community would not even exist. I assure you, this would be an immeasurable loss to us indeed.

Again, please approve the above-noted application for WOCH TV in Chicago.

Sincerely,

  
John Beck

Re: FCC File No. BPTTA-20050127ALO

To Whom It May Concern:

I understand the above application has been filed by Station WOCH Chicago to increase the wattage allocated to it on Channel 41. I request the FCC approve the application.

I have been an English-speaking viewer of WOCH for 5 years. I consider WOCH an invaluable resource for education about Korean culture and entertainment. Personally, it will devastate me if it were to go off the air. I am a member of one of the largest on-line fan clubs of Korean--specifically WOCH--programming (Chicago Korean Drama Fan Club). The Chicagoland community has been enriched through the programming on WOCH not only because of the cultural and historical information imparted, but because without the English-subtitled programming provided by WOCH, our on-line community would not even exist. I assure you, this would be an immeasurable loss to us indeed.

Again, please approve the above-noted application for WOCH TV in Chicago.

Very truly yours,

FCC - MAILROOM

November 1, 2005 1:04 PM

Senator Jim Demint  
U. S. Senate  
340 Russell Senate Office Building  
Washington, DC 20510-0001

Subject: Re: Federal-State Joint Board on Universal Service CC Docket 96-45

Dear Senator Demint:

I have serious concerns regarding the Federal Communications Commissions' (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so.

A flat fee tax could cause many low-volume long distance users, like students, prepaid wireless users, senior citizens and low-income residential and rural consumers, to give up their phones due to unaffordable monthly increases on their bills. Shifting the funding burden of the USF from high volume to low-volume users is radical and unnecessary. In addition, it would have a highly detrimental effect on small businesses all across America. The Keep USF Fair Coalition, of which I am a member, keeps me informed about the USF issue with monthly newsletters and up to date information on their website, including links to FCC information. While I am aware that federal law does not require companies to recover, or "pass along" these fees to their customers, the reality is that they do. As a consumer I would like ensure I am charged fairly. If the FCC goes to a numbers taxed, my service will cost more. And according to the Coalition's recent meetings with top FCC officials, the FCC has plans to change to a flat fee system soon and without legislation.

I will continue to monitor developments on the issue and continue to spread the word to my community. I request you pass along my concerns to the FCC on my behalf, letting them know how a flat fee tax could disproportionately affect those in your constituency.

Thank you for your continued work and I look forward to hearing about your position on this matter.

Sincerely,

Susie Hartley
